What's in it for you?

- Inexpensive and easy to use
- Reliable and accurate
- One shot test, fast result

Product Name	Part Number	Quantity
ETK	475360	12

Uses:
Simply fill the bottle with oil on bottle neck and shake. If test remains purple, the oil is safe: if it turns yellow, acid is too high. The ultra sensitive color change guarantees an accurate test. Marginal conditions cause partial color changes. A Color comparison chart is packed in every box.

Accurate at the time of going to print.
